

TRIPLETS

BUILD YOUR SATISFACTION WITH THIS RULE OF 3

TRIPLETS

FOR COMPLETE SERVICE TO MY CUSTOMERS INCLUDING DRILLING

"I need an affordable solution to do most of the jobs including drilling. I don't have a huge amount of jobs to edge per day. For me the quality control of the service I deliver to my customers is the key."

FOR FLEXIBILITY & MINIMISED WORKSHOP EFFORT

"I need a solution with the flexibility to outsource or edge in house what I want, when I want. It must do the grooving & chamfering and the blocker must help me avoid mistakes in lens blocking."

FOR AFFORDABILITY INCLUDING GROOVING & CHAMFERING

"I need for my small shop an affordable solution including grooving & chamfering. Drilling features are not necessary as I'm quite good in working with my stand alone drilling device."

FOR SIMPLICITY WITH REMOTE EDGING

"I need essentially to outsource the edging but I still need a reactive solution in case of issues to keep the service to my customers. I'm not demanding on the edger features as I do chamfering & grooving myself."
